The Social Contribution, Sustainability and Ethical Values Commission:

- Social Contribution Studies :**
 - Contributing to the development of projects for the broader community at school.
 - To organize and support social responsibility activities in cooperation with society.
 - To cooperate with the local people and governments and plan activities according to needs.
- Sustainability Activities :**
 - To promote environmentally friendly school practices in general.
 - Operations such as recycling, energy efficiency, and waste management are carried out.
 - To project sustainable development goals.
- Dissemination of Ethical Values :**
 - To lay the foundation for academic and professional ethical principles.
 - To ensure that ethical values are included in school units.
 - Organizing informative activities and training to prevent ethical obstacles.
- Education and Awareness Studies :**
 - Activities such as social contribution, sustainability, and ethical information seminars, panels, and workshops are organized.
 - The increase in students and awareness in these areas is increasing.
- Monitoring and Evaluation :**
 - The Commission's activities are regularly updated.
 - It enables the emergence of activities and systems, and reports their effects.
- Stakeholder Collaboration and Coordination :**
 - To work in cooperation with other commissions and administrative units.
 - To cooperate with local governments, non-governmental organizations, and public administrations where necessary.
- Policy and Guidance Development :**
 - Incorporating social participation, sustainability, and ethical layers into the school system.
 - To provide suggestions within the framework of relevant legislation and national/international standards.
